캔 프
CANCER FRIEND

President

Coop helping cancer patients
and their families return to
society by conducting various
profitable businesses

길냥이사랑단

Representative

Straycat Care Organization
supported by subsidy project
for 4 years

Writer

My Mission

Welcome to Zero Club

Zero Club in Korea

JIN TOUR

Characteristics of CML patients in South Korea

High Early Detection Rate

Regular adult checkups supported by The country

Most CML patients find it early so treated with oral medicine

Severe Patient System

Pay only 5% of the cost of treatment and medication

BCR-ABL genetic test is $7
If you take four pills a month, it costs $50 a month

National Health Insurance System

Health check-up system for all citizens

Pay only 20% of the general medical expenses
In the case of cancer patients, it will be severely applied, so only 5% will be paid by themselves

High Rate of Social Rehabilitation

You can return to your daily life by taking medicine

Most want to forget that they were sick

Needs For Different Levels of Support

After Diagnosis

Am I cancer? Leukemia?

I have to take medicine for the rest of my life?

Shock Management

Contact with KBDCA or Hospital Support System

Blood donation cards, medication expenses, etc

Expenses support

Initial Treatment

How did I get cancer?

Don't blame yourself.

Mental Management

Consult with doctor

Dose control, drug change, etc

Side Effects Management

Return to Society

Eat well, sleep well, poop well

Laughter and gratitude

Daily Life Management

Non-recurring Work Life

Consideration of job change

Social Rehabilitation Assistance

Goals of Zero Club

The Best Thing
For management of Shock & Mental & Life
is

showing the healthy CML survivors
